Judith Reidel  
The Kitchen Lady

Judith is much more than The Kitchen Lady, she is soup to nuts designer.

My husband and I moved to Long Island from Upstate New York, Skaneateles. Judith Reidel was probably THE first "local" we met. We purchased a contemporary "diamond in the rough" on Long Island's North shore, surrounded by the LIS and Fresh Pond, absolutely beautiful location, but the house needed care and attention.

Judith welcomed our unique challenges and listened to all our wants and desires. She designed a beautiful contemporary kitchen given our limitations. Judith is the designer and supplier of the cabinets, but she completes the comprehensive project including measuring, laying out the design, checking all the deliveries, keeping in touch with the installer as the kitchen is installed and seeing the completed work. She has wonderful connections with honest/quality vendors to supply your appliances, granite, hardware, sinks, faucets, lights, unique accessories and skillful and superb workmanship for the demo, rebuild and installation of the entire kitchen.

The Kitchen Lady has a knack for finding that unique piece that claims your kitchen as your very own. She brings all the colors and pieces scattered around the available sources, and brings it all together in a meaningful, artistic design.

Her design talents are not limited to the kitchen. Judith designed and worked with us in our Den with custom entertainment center and new bar complete with sink, dish drawer, under counter refrigerator and wine cooler, along with two separate beautiful bathrooms with marble and glass.

Judith makes things work. She always finds a solution to a seemingly dead end situation. Most importantly, Judith is a good, honest person with a lot of heart. My husband and I would always recommend Judith Reidel for designing and assisting with kitchens, bathrooms, entertainment centers and bar. Any upscale project that evolves around cabinetry and design with attention to detail.
